## Quality Accommodations

Bwindi & Lake Mburo Areas

Established in 1959, Kimbla-Mantana has its roots in providing luxury accommodations to travelers in southwestern Uganda. With the comforts of the modern age and an emphasis on personal service, we provide overnight accommodations in both the Bwindi and Lake Mburo areas.

Our Ugandan properties combine seclusion and exclusivity in enchanting surroundings, offering extraordinary contrasts of comfort and wilderness.

Our luxurious retreats are priced reasonably and we put emphasis on personal service and idyllic settings where guests can unwind after each day's activities.

Kimbla-Mantana's properties have excellent dining facilities with our kitchens preparing delicious food of the highest standards, complemented by the freshest vegetables, tropical fruit as well as a nicely stocked bar.

The service is warm, friendly and unobtrusive. Our staff, in keeping with our company policy, are from the local communities, with a wealth of knowledge of the areas in which they live and work and are trained to make sure that our clients have a relaxing and enjoyable stay

### ***The Engagi Lodge-Bwindi***

If your travel plans include a visit to the Bwindi National Park area, we encourage you to stay at our Engagi Lodge. In 2008 this property, which was formerly a tented camp, was completely rebuilt as a modern lodge with custom built cottages.

The Engagi Lodge-Bwindi consists of just 8 en-suite cottages, evenly spaced out and hidden in the foliage. Each cottage has either double or twin beds (complete with hot water bottles), a bathroom with flushing toilets, hot and cold running water. All have private verandas where guests can enjoy their morning tea or coffee as they watch out over the forest canopy.

Electricity is supplied by solar power, with a backup generator. Hot water is supplied by wood burning boilers, however we intend to install solar powered heaters in the future with the wood burners as backup

Guests will be able to enjoy a number of private walking trails around the lodge and down to the river. They may also enjoy a visit to a number of the functioning tea farms inside the site which are maintained by members of the community.
